SEP 28 2006

SUMMARY OF INTERVIEW

Applicants wish to thank Examiner Lankford for the courtesy extended during the personal interview held on September 13, 2006 and the helpful comments made therein. During the interview between the undersigned and Examiner Lankford, the indefiniteness rejections under 35 U.S.C. § 112, second paragraph, and the non-statutory subject matter rejection under 35 U.S.C. § 101 raised in the Office Action mailed March 29, 2006 were discussed. The undersigned and Examiner Lankford agreed that a claim directed to a self-contained adipose stem cell processing unit, comprising: a tissue collection container that is configured to receive adipose tissue that is removed from a patient, wherein said tissue collection chamber is defined by a closed system; a first filter that is disposed within said tissue collection container, which is configured to retain adipose tissue and pass lipid, blood, and saline; a mixing container joined to said tissue collection container, which comprises a port for the addition of an agent, wherein said mixing container is within said closed system; a cell collection container positioned between said tissue collection container and said mixing container, which is configured to receive and concentrate a population of cells that comprise adipose stem cells from said tissue collection container before being passed to said mixing container, wherein said cell collection container is within said closed system; and an outlet configured to allow the aseptic removal of said concentrated population of cells that comprise adipose stem cells, would likely overcome the rejections set forth in the Office Action dated March 29, 2006.

Respectfully submitted,

KNOBBE, MARTENS, OLSON & BEAR, LLP
